## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Rader et al (US 6,67,099).

Rader et al discloses a method of operating a digital tuner (see Fig. 2), comprising:

digitizing a first number of input signals (from mixers 204) to create respective streams of digitized input data (output from A/D's 210),

providing a second number of per-channel front-ends (digital down converters DDC's 214) for performing baseband translation and filtering in the digital domain and providing outputs suitable for subsequent demodulation, see Fig.2 showing DDC performing baseband translation (1220) and filtering (1224), col. 5, lines 18-39 and col. 5, lines 53-55,

providing each per-channel front-end with an input selector (1216 in Fig. 12) coupled to each of the streams of digitized input data; and

configuring each of the per-channel front-ends to process a selected one of the first number of streams of digitized input data. See Fig. 12 showing a "per-channel front end" configured to process a selected digital input data stream.
